- Configured basic router and gained knowledge on implementation of MicroTic routing, subnetting and VLAN.
- Aided as IT support during the college event IIC Industrial Fair, 2021.

PROJECTS

MyStay, Homestay Booking Web Application
A fully functioning web application that allows users to book homestays easily and effectively. Homestay owners can use it to boost their business. This web app eases the booking process for accommodation during travel resulting in the promotion of the tourism industry.

Date Mandip
I along with my other two friends, developed a personal dating site for one of our friends, Mandip Gurung, and hosted using w3school (an online learning platform) as https://date-mandip.w3spaces.com/. As a beginner in web development, we learned more about it. It was a fun method to learn.

Personal portfolio
Participated in a workshop on portfolio development organized by the college. Thus, able to make a portfolio of my own. Later, with a bit of research on GitHub, I was able to host it as the domain name parasmanirai.com.np using GitHub.

Quiz Android application
A Quiz android application built using Android Studio and Kotlin. The app uses MySQL as its database and has the functionality to provide final score. The app can be used for practicing objective questionaries on different fields since the questions can be changed using phpMyAdmin easily.

TECHNICAL AND SOFT SKILLS

Technical skills: PHP, Python, Java, Kotlin, MySQL, Java Script, Laravel, GitHub, HTML, CSS, Bootstrap, Oracle Database, WordPress

Soft skills: Communication and collaboration, Leadership and Teamwork, Time management and coordination
